

Door Open Too Long Alarm System

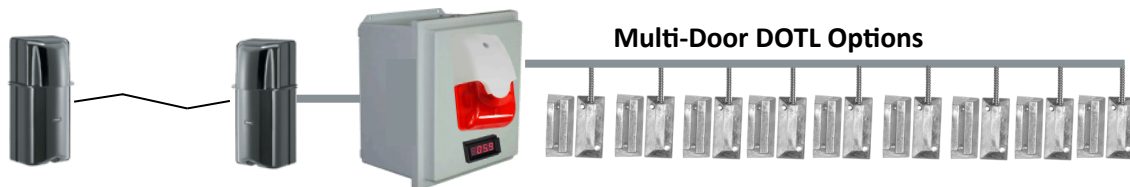

The perfect solution for monitoring doors that should remain shut like fire escapes, high security portals, fridge and freezer doors but still, allowing normal ingress / egress. The siren will sound if door is held open longer than pre-programmed delay time. Alarm automatically stops once door is shut, whilst always staying armed. Features Include:

- Extra long industrial reed switch and magnet
- 135 dB Piezo Siren
- IP53 ABS case with internal mounting screws
- Programmable 1 - 600 second delay time
- 30 day battery backup if power lost with battery low indicator (12V 7A Battery Backup)
- Multiple programming and hardware configuration options
- Includes 12VDC SLA power adapter / charger, warning decal, screws and manual
- General compatibility with a multitude of door types, complete with 'how-to' manuals for the most common

OPTIONS

- Addition of key override switch to defeat siren (inc 2 keys)...**\$39**
- Addition of PE cell (as pictured below) with max 40m range on 10m cable to DOTL...**\$350**
(For multiple doors, when one of the doors open, it breaks the PE beam triggering DOTL)
- Addition of 1 x Heavy duty Reed switch with 20m cable for each (up to 9)...**\$90**
(For up to 9 doors to trigger DOTL)
- Replace 135dB with 85dB siren...**\$45**
- User defined trigger timing 1-600 seconds...NC (Please advise at time of order)
- Custom integration into user specific doors and door types

\$270 DOTL
