- 3. The backup log will now appear. Select whether backing up onto CD/DVD or one of your internal or a external drive e.g. USB stick.
- 4. Select the dates and times to be backed up. Please note that the date time format is MONTH/DAY/YEAR.
- 5. Select which cameras you need backed up.
- 6. Ensue that Database Files is ticked (under Clean All).
- 7. Click OK after you've double checked all date / times, cameras etc.
- The Backup information screen will come up displaying the backup information you have selected to be backed.
- It will ask you Are you sure to backup Click OK.
- The footage has now been saved to selected drive, CD/DVD which you selected.
- Open the drive where the footage is saved and look for a folder with the SIBK followed by numbers e.g. SIBK100802 as the folder name, this is the folder where your footage has been stored.
 - Click on the EZViewlog500 to view footage. This will load viewer program
- EZViewlog500 operates as per normal Viewlog viewing procedure. (Refer to Multicam Surveillance System user manual)
